

WENZ CONSULTANTS

presents the

Pastel Certified Schools Programme

Knowledge and experience of Pastel Accounting software is frequently demanded by employers.

Pastel Accounting is easy to learn and easy to use and your child can gain practical skills that will make him/her more marketable by signing up for the Pastel Certified Schools Programme.

Why introduce computerised accounting to your school learners?

Accounting is very much a life skills subject and schools should not only be teaching learners to pass the grade 12 exam, but should also be giving them basic skills to provide them the opportunity to take their place in the economy.

Within the business world it is essential that employees have the necessary computer skills. The present system utilised in the classroom, namely manual accounting, must be enhanced to ensure that learners are provided the relevant skills when completing school.

Taking all of the above into consideration Pastel took the initiative with the idea of “educating the nation” and created the Pastel Certified Schools Programme (CSP) with the main purpose of:

1. Education and development for school learners
2. Improving quality of learning for school learners
3. Providing a life skill to school learners
4. Pastel Accounting Software Training provides for job opportunities.
5. The CSP programme is fully aligned with the Department of Education’s accounting curriculum. It also follows National Curriculum Statement (NCS) principles, so that at the end of the course, learners have not only acquired practical skills in accounting but also in using computerised accounting software.
6. The CSP programme is designed as a learning aid to assist and enhance the learning processing within the accounting environment.

Schools obligations to the youth of our nation

Schools play a prominent role in increasing the skill level of the youth of South Africa and as such, Pastel believes that schools are the foundation of the Pastel education channel. Pastel therefore built the CSP programme to assist schools with this development of learners.

Benefits for the school learners

Besides the requirements of the Subject Curriculum, there are numerous practical benefits to introducing learners to computerised accounting. A few of these benefits include:

- Introducing experiential learning into education
- Enhancing the education system by aligning education with business needs
- Developing and stimulating learners
- Exposing learners to market related skills
- Improving the learners employment opportunities
- Development of the workforce

How does the Pastel Certified Schools Programme (CSP) work?

The CSP programme runs over 3 years, namely:

- Grade 10
- Grade 11
- Grade 12

There is also a school holiday program for Grade 11 and 12 students to catch up the back log. The program will take place after school, either on the school premises or at a venue close by.

The learners CSP pack

On the initial sign up, each learner will receive a CSP pack which will contain:

1. The CSP manual / text book for all 3 grades (10-12)
2. Pastel Partner educational software
3. Pastel Auditor educational software
4. The Pastel Assessment serial numbers for Pastel Assessments (for the 1st year)
5. Notepad
6. Pen
7. Lanyard
8. Pencil case

Cost per student

With Wemz Consultants your child can register for the Certified Schools Program for as little as R1500.00 per year with a cost of R250.00 upon registration. Contact us for more information about our fees for our catch-up CSP course as well as holiday school options.
